Summary of Key Decisions:

Decision ref	Key Decisions
1	Agreed for Brent & Harrow CCGs to transition to All Patients data feed, with exception of practices who have objected to All Patients data sharing
2	Suggested to write up set of design standards to pass on to outside teams who may develop future functionality for WSIC Dashboards
3	Agreed that intellectual property ownership of material based on WSIC data warehouse should be explicitly agreed prior to the onset of development work. This is regardless of whether the bulk of the development effort is provided by the WSIC development team, a WSIC partner, or is outsourced.
4	Agreed not to deploy Asthma Radar in current specification, but to wait until upgrades suggested by Dr Mark Levy have been implemented
5	Agreed that below items are prioritised for inclusion in Release 11 development plan: <ul style="list-style-type: none"> ○ Changes to Asthma Radar suggested by Dr Mark Levy ○ EFI filter on Patient Radar ○ Provider-specific filter for patients (SCOPING ONLY) ○ Removal of administrative GP activity from Activity Summary screen ○ Direct link from SystemOne into Dashboards (SCOPING, dependent on TPP co-operation) ○ Initial scoping of changes required in preparation for SNOMED (SCOPING ONLY) ○ Expansion of SUS UCC data to extra providers ○ Application of commissioner cost for UCC attendances derived from the SUS dataset.
6	Agreed to remove administrative GP activity from Activity Summary screen in line with definition in GP Activity screen (read code beginning with ('9')). Agreed for WSIC team to present list of exceptions to this rule at next meeting

7	Suggested to expand descriptions of each section of Dashboard landing page to describe functionality to new users
8	Agreed that incorporating Babylon 111 app data into WSIC Data Warehouse would be clinically useful, with need to explore possible visualisations of data to fulfil direct care purpose
