Known issues under development

- **Deceased patients** may appear in the dashboard due to a new read code being used to identify these patients.
- **Use the navigation icons on the bottom** rather than the tabs at the top of the screen to navigate around the Dashboards.
- **Provider shown as 'unknown'** more often than expected for acute activity tooltips on the Activity Summary screen.
- A small number of practices may not be receiving **weekly data increments** at present. Those who are impacted will be notified by email.
