Kavitha Saravanakumar	Deputy Director of Business Intelligence and Data Management, NWL CCGs
Ben Treasure	Whole Systems Integrated Care, NWL CCGs
Suhaib Rashid	Whole Systems Integrated Care, NWL CCGs
Patrick Iyoriho	WSIC Diabetes Analyst

Summary of Key Decisions:

Decision ref	Key Decisions
1	WSIC team to proceed with deployment of Diabetes Population Health phase 2 scripts to Production database, but this Dashboards will not be published to Live until confirmation received from London LMC
2	Suggested to look for external funding for COPD dashboard – perhaps explore possibility of RightCare funding
3	Noted that external funding is helpful to increase capacity of core WSIC team to deliver wider developments & increase number of available dashboards
4	Emphasised that all externally-developed Dashboards must follow same design approach as existing and internally-developed Dashboards
5	The following items were prioritised for development in Release 14: <ul style="list-style-type: none"> • Care homes (further scoping needed to agree exact parameters of development) • Scoping of possible combined Heart Failure & Hypertension dashboard • COPD Dashboard (possible external development) • Alterations to existing Diabetes radar
6	Noted that it will need to be considered what datasets will be needed to include in next release to facilitate development of prioritised dashboards

Summary of actions arising:

Action ref	Action	Owner	Due date
1	Tony Willis to feed back to WSIC team regarding final decision of London LMC on Diabetes Population Health dashboard	Tony Willis
